EXPERIENCE

Co-Founder & Chief Executive Officer
2019 – now

Hundred MS · Florida, Germany, Armenia

- **40+ professionals, four countries:** built a boutique finance operations, ERP and advisory firm for US small and mid-sized businesses from a single outsourcing contract.
- **50+ clients:** managed services and advisory, from bookkeeping through the fractional-CFO seat: close management, managerial accounting, reconciliations, audit support.
- **Valuation, restructuring and M&A** advisory across private equity, insurance, technology, healthcare, manufacturing and consumer goods.
- **Systems as a moat:** NetSuite implementation, integration and optimisation with certified administrators on staff; QuickBooks, Sage and Xero alongside.
- **All core delivery staff directly employed**, not subcontracted. Florida entity for US contracts, German entity for Europe, delivery core in Yerevan.

Co-Founder & Chief Executive Officer
2023 – now

PrometAI · AI business planning and valuation

- **100,000+ founders, 100+ countries:** AI-driven, data-enhanced business plan and valuation platform.
- **90% complete a first draft in one session;** 50+ tools live across the founder journey.
- Productised the frameworks, datasets and valuation methodology developed over years of hands-on advisory work.

Owner
2019 – 2023

Hundred Core · fund management, Yerevan

- Acquired the fund management arm of Dimension Investments and rebuilt it under an institutional operating model.
- **+77.6% in US dollars, +84.2% in euro, +47.3% in dram** life to date; every year positive in hard currency.
- Wrote and ran a formal investment strategy statement and risk appetite statement, with proprietary performance attribution.
- Built the **only value-at-risk model in the Armenian fund industry** and reported it monthly; we could not find a professor equipped to supervise it as an academic thesis.

Co-Founder & Chief Executive Officer
2018 – 2019

Dimension Investments · Yerevan

- Founded and licensed a Central Bank regulated investment company, standing up the licence and compliance framework from scratch.
- **70% return on equity in a single year** on a leveraged government bond book. A falling-rate market helped; the budgeting, forecasting and risk discipline were ours.
- Deleveraged and moved to cash ahead of the post-pandemic rate rise, protecting investor capital.

Earlier
2014 – 2018

- **Head of Research, ROQ Capital** (formerly Armenbrok), Yerevan, 2017 – 18: Armenian capital markets research; completed the CFA charter in the seat.
- **Financial Planning Manager, Untiac General Trading**, UAE, 2014 – 16: FP&A and working capital; passed CFA Levels I and II while working full time.

PROFILE

Fifteen years making financial complexity legible. A licensed fund, a CFO practice and an AI company; most finance professionals go deep on one, I have run all three, and each one paid for the next.

Open to one mandate: a C-suite seat where a finance function has to be built, fixed, or turned into a product.
